DMA Code	524

Community Injury Data

What are the leading causes of injury in your community? Please select the top three causes of injury. *

» Falls
» Suicide
» Other (Please specify): Injuries related to alcohol use

Initiative Name:

Monitoring Data for Student Injury Prevention and Alcohol Risk Reduction
Part A - ACHA-NCHA II
Part B - Campus Life Dashboard

Injury Issue it addresses. (Select one.) *

» Other (Please specify): Injuries related to alcohol use

Does this initiative align with one of the three leading causes of injury in your community you identified at the start of the
survey? *

» Yes

What is the goal of this initiative?
(i.e. Reduce falls in older adults, increase the number of employers in the coalition implementing a no cell phone use while driving policy)

A - We use data from the National College Health Assessment, implemented every 3 years, to monitor

student self-reported information. We share these results with students and other stakeholders via presentations and social media to influence behavior and relevant policies.
B - Accurately track the number of AOD related student involved incidents, including hospital transports and law enforcement encounters

Is this initiative based on promising or evidence based practices? *

» No

Please indicate what this initiative is trying to accomplish? (Select all that apply.) *

» Enhancing an individual's knowledge and skills to prevent injuries or illness and promote safety and health
» Reaching the community with information and resources to promote safety and health
» Educating public health and safety professionals, doctors, and other providers who will disseminate knowledge and skills to others
» Bringing coalitions and networks together to work on Safe Communities goals for greater impact
» Changing organizational practices to improve safety and health
» Influencing policy and legislation (local and state)

What type of funding do you have (are you seeking) for this initiative? (Select all that apply.) *

» No funding

How are you measuring progress or impact?
(i.e. Number of people reached, number of med drop units, pounds of medications collected, pre and post surveys, pre and post data analysis, etc.)

A -
Source: American College Health Association. American College Health Association-National College Health Assessment II: Institutional Data Report Fall 2014 Emory University. Hanover, MD: American College Health Association; 2014.

• 34.4% of respondents have received information on injury prevention from Emory.
• 46.4% of respondents are interested in receiving information about injury prevention from Emory.
• 84.4% of respondents always wore a seat belt when they were riding in a car within the last 12 months.
• 22.1% of respondents always wore a helmet when they were riding a bicycle within the last 12 months. (49.4% didn't ride a bike in the past year)
• 8.4% of respondents always wore a helmet when they were riding a motorcycle within the last 12 months. (88.7% didn't r! ide a motorcycle in the past year)
• 3.6% of respondents always wore a helmet when they were inline skating within the last 12 months (91% didn't inline skate in the past year)
• 23% of respondents drove after drinking any alcohol at all in the last 30 days.
• 0.7% of respondents drove after drinking 5+ drinks in the last 30 days.

Alcohol protective factors: 'During the last 12 months, when you 'partied'/socialized, how often did you:' (Percentages include those who responded 'most of the time' or 'always')
• Alternate non-alcoholic with alcoholic beverages: 30.6%
• Avoid drinking games: 37.3%
• Choose not to drink alcohol: 15.3%
• Determine, in advance, not to exceed a set number of drinks: 32.6%
• Eat before and/or during drinking: 64.8%
• Have a friend let you know when you've had enough: 27.3%
• Keep track of how many drinks you were having: 55.7%
• Pace your drinks to 1 or fewer per hour: 27.6%• Stay with the same group of friends the entire time you were d rinking: 69.2%

• Stick with only one kind of alcohol when drinking: 37.7%
• Use a designated driver: 67.2%
Consequences of alcohol use: 'Within the last 12 months, have you experienced any of the following when drinking alcohol?'
• Did something you later regretted: 24.7%
• Got in trouble with the police: 1.0%
• Someone had sex with me without my consent: 1.8%
• Had sex with someone without their consent: 0.4%
• Had unprotected sex: 14.0%
• Physically injured yourself: 8.2%
• Physically injured another person: 0.4%
Within the last 12 months, 4.3% of respondents had been diagnosed or treated by a professional for a broken bone/fracture/sprain.
Within the last 12 months, 1.8% of respondents had been diagnosed or treated by a professional for a repetitive stress injury (e.g. carpal tunnel syndrome).
Within the last 12 months, 2.6% of respondents reported that injury (e.g., fracture, sprain, strain, cut) negat! ively affected their academic performance.

B -
Changes in numbers of students transported to ER for ETOH poisoning
Changes in other alcohol related incidents
Changes in cannabis and other drug related incidents

Initiative Name:

Falls
Part A - Student Concussions and Head Injuries
Part B - Preventing Falls from Rooftops

Injury Issue it addresses. (Select one.) *

» Falls

Does this initiative align with one of the three leading causes of injury in your community you identified at the start of the
survey? *

» Yes

What is the goal of this initiative?
(i.e. reduce falls in older adults, increase the number of employers in the coalition implementing a no cell phone use while driving policy)

A- Reduce student injuries from falls (from bunk beds)
B - Reduce falls from rooftops

Is this initiative based on promising or evidence based practices? *

» Yes

If Yes, please provide a link to the evidence in the space below.
(i.e. Link to peer reviewed journal article, CDC compendium on Falls, SAMHSA's National Registry of Evidence-based Programs and Practices, etc.)

A - NA
B -

*

» No funding

How are you measuring progress or impact?
(i.e. Number of people reached, number of med drop units, pounds of medications collected, pre and post surveys, pre and post data analysis, etc.)

A -
Emory Student Health Services clinical providers noted a significant increase in concussion/head injury visits in 2014 (these data include number of visits to Student Health Services, including the Varsity Athletic Training Room Clinic):

Concussion (850.9) Head Injury (854.00)
Total visits Total patients Total visits Total patients
2014 97 65 33 28
2013 48 35 33 31
2012 40 31 20 ! 19
2011 33 23 31 26
2010 30 24 39 31

The significant increase in 2014 visits for concussion/head injury visits represents either increased numbers of injured students, an increase in severity of injuries (resulting in a larger number of follow-up visits per student) or both. While most concussions/head injuries were sports-related, as is always the case, providers were alarmed by the number of students who reported falling out of their bunk beds (top bed) and hitting their heads on the floor.

Student Health Services contacted Residence Life and Housing and ascertained that bunk beds, made available to residence hall students for rent from an outside vendor, did not have railings on the top bunk.

Student Health! Services strongly recommended to Residence Life and Housing that they require vendors to provide only bunk beds with side rails and that students be informed that they are not to remove the rails. Residence Life and housing will institute this change for 2015-16. Data will be re-evaluated in 2015 and 2016 to look for trends/improvement.
B - Internal audits

Initiative Name:

Suicide Prevention Coalition (Emory Cares 4U)

Injury Issue it addresses. (Select one.) *

» Suicide

Does this initiative align with one of the three leading causes of injury in your community you identified at the start of the
survey? *

» Yes

What is the goal of this initiative?
(i.e. reduce falls in older adults, increase the number of employers in the coalition implementing a no cell phone use while driving policy)

Increase access to mental health services and prevent suicide via utilization of non-traditional screenings (the on-line Interactive Screening Program for Suicide Prevention) and bystander training (Question, Persuade Refer).

Is this initiative based on promising or evidence based practices? *

» Yes

If Yes, please provide a link to the evidence in the space below.
(i.e. Link to peer reviewed journal article, CDC compendium on Falls, SAMHSA's National Registry of Evidence-based Programs and Practices, etc.)
