Offer the New York state-certified DDC course to help save lives and reduce costs

National Safety Council (NSC) Defensive Driving Courses (DDC) are the most effective training for changing driver behaviors to prevent injuries and deaths. You may not be aware, however, that DDC- NY is a state-certified six-hour course that you can offer to help keep drivers safe, reduce insurance rates and drive home savings for you by reducing the steep costs of motor vehicle accidents.

How the NSC DDC- NY course saves:

- **Lowers insurance rates.** Complete the course and receive **up to a 10% discount** on your insurance premiums each year for three years.
- **Reduces violation points.** Reduce as many as **four (4) points** on your driving record for violations incurred within 18 months prior to course completion.
- **Imparts life-saving driving skills.**

Why this training pays!

- You'll share our indisputable status as the leader in driver improvement.
- You'll drive down the number of insurance claims, vehicle repair expenses and the costs of lost productivity.
- You'll drive home skills that save lives by providing NSC driver training — the best offered — from the organization that pioneered driver improvement training in the state of New York.

Proven value of partnering with NSC

- DDC- NY is the first driver improvement course approved in New York State — and, more than 30 years later, remains its premier program to ensure safe, lawful, responsible driving.
- Since 1964, NSC has trained more than 65 million people to drive defensively.
- Nationally, NSC defensive driving courses are trusted by more individuals, businesses, courts, law enforcement and government agencies than those from any other driver training provider.
