

DDC DISTRACTED DRIVING ONLINE *Available Spring 2015!*

NSC Driver Safety Training

Distracted Driving has become an epidemic – and it's not just teen drivers!

Thousands die needlessly each year because people continue to use their cell phones. Using a cell phone while driving makes it four times as likely that you'll crash - while using either handheld or hands-free devices. The cost to employers of distracted driving is high – not just in lives lost, healthcare costs, and vehicle repair costs, but in the millions of dollars paid out by the drivers' employers in liability cases. Everyone knows distracted driving is dangerous, but a majority of drivers continue to consciously use their mobile devices while driving.

Course description

Through a high degree of user interactivity, the 60-minute Distracted Driving Online course is designed to change drivers' attitudes and behavior related to distracted driving so that they pledge to stop texting and talking on their cell phone while driving.

What participant will learn

- The science of distracted driving
- The myth of multitasking
- Debunking productivity loss
- The personal, corporate and societal cost of distracted driving
- How to avoid distracted driving

Course features

- Adaptive curriculum provides the most appropriate custom content based on the individual drivers' profile
- Integration of your Corporate Cell Phone Policy
- Interactive exercises and activities
- Fully narrated with video and animations
