

DRIVER IMPROVEMENT

Defensive Driving Course – Motorcycle Safety Program Online

FACT:

Fatalities among motorcycle riders and passengers increased 104% between 1995 and 2005 – almost 50% of those killed were 40 or older.

The first online course designed to reduce motorcycle injuries and fatalities

- Developed in partnership with the Motorcycle Safety Foundation®, for experienced motorcyclists
- Educational, interactive and motivational
- Easy to complete, even for those with limited computer skills
- Bookmarking feature lets users pick up where they left off as often as needed to complete the course

Course description

More people are riding motorcycles, and that means more potential injuries and deaths. Not only have fatalities increased 100% in recent years, but almost half of them are in the 40 and older age group. To help reduce those alarming numbers and steer all motorcyclists to greater safety, the National Safety Council has partnered with the Motorcycle Safety Foundation to provide a first-rate motorcycle safety course that helps experienced riders avoid deadly collisions. This two-hour Web-based course combines top-quality content with state-of-the-art Internet technology for a learning experience that is interactive, motivational and educational.

What you'll learn

- Rider awareness
- Preparation for riding
- Riding skills
- Riding risks assessment
- Street riding strategies

Who would benefit

Motorcycle riders and passengers
