

ENVIRONMENTAL, HEALTH & SAFETY

Safety Training Methods (STM)

INTERNATIONAL

This course counts toward your Advanced Safety Certificate

Safety Training Methods (STM)

This course gives you the tools to create or select training programs that truly engage employees and improve your organization's safety performance. In 4 1/2 days you'll learn how to make educated decisions about the safety training needs of your workforce. You'll cover needs analysis, performance objectives, instructional strategy and methods, content, delivery evaluation and costs.

STM meets the criteria of ANSI Standard Z490.1-2001 for accepted practices in environmental training, health and safety. This one course touches all the issues you'll likely face as a safety trainer, and you'll learn techniques from the leaders in safety training.

The result

You'll learn how to create, select and deliver training that helps your organization achieve its safety and business goals.

Who should take this course

Managers, supervisors, human resources professionals or anyone responsible for planning, developing or delivering safety training.

What you'll learn

- Setting realistic expectations for employees
- Understanding how to connect with employees by addressing different learning styles
- Identifying training and non-training solutions for safety and health issues in your workplace
- Calculating direct and indirect training costs for more effective budgeting
- Measuring the success of your safety training program using proven methods
- Developing your presentation skills to build your self-confidence as a trainer
- Applying newly learned concepts to a variety of safety and health training scenarios
- Discussing training issues and sharing solutions with other safety professionals
- Designing a custom safety training program for your organization

Take a positive step

Certificate in Principles of Safety. You'll go beyond compliance to explore best practices in safety. You'll get practical information you can use every day.*

Advanced Safety Certificate (ASC). Maximize your effectiveness as a safety manager and leader. Develop skills you need to take your safety program to a new and more powerful level. The course will also help you prepare for the Certified Safety Professional exam.

4 1/2 days, 3.0 CEUs†

***Note to ASC candidates:** Complete the Principles of Safety and Health (POSH) course and earn your Certificate in Principles of Safety. An additional 5.2 hours of CEUs must also be completed to earn your Advanced Safety Certificate (ASC). Please note that all ASC requirements must be completed within five years of completion of the first course.

†Continuing Education Unit

A Continuing Education Unit (CEU) is a measure of participation in a recognized continuing education program with qualified instruction and sponsorship. CEU records are widely used to provide evidence of completion of continuing education requirements mandated by certification bodies, professional societies or government licensing boards.
