

FIRST AID

Standard First Aid, CPR, and AED

INTERNATIONAL

**Standard First Aid,
CPR and AED
Instructor Resource Kit**
Product #73058-0000

The National Safety Council® has long been recognized as a leader in emergency care training. NSC® makes it easy for anyone to learn or teach our Standard First Aid, CPR, and AED course. We give you all the background information and skill testing you need to feel confident in the event of an emergency and help save a life.

Get the best first aid, cardiopulmonary resuscitation (CPR) and automated external defibrillator (AED) training in one simple program. Whether it's as simple as a sprain or as serious as sudden cardiac arrest, this class has it covered. In 5 1/2 hours, anyone can learn how to recognize an emergency, act appropriately and sustain life until professional help arrives.

- The first aid training covers all the basics: breathing emergencies, sudden illness and injury, bleeding, and preventing disease transmission.
- The segment teaches the principles of basic life support. You'll also learn how to manage a choking victim and how to prevent disease transmission.
- The AED portion of the program details key operating characteristics of AEDs and shows you the proper way to use one, proper precautions and maintenance techniques. It also includes guidelines for meeting the state public access defibrillation (PAD) laws.

This interactive course combines lecture, video, group discussion and hands-on training. The student manual serves as a great onsite reference guide you'll use again and again, and now it includes a pull-out First Aid Quick Guide and the Video-Self-Instruction DVD for retention and home use.

If you want to teach Standard First Aid, CPR, and AED, NSC is the smart choice. If you're teaching another program, we can grandfather you in. Or, you can become an NSC authorized emergency care instructor in as little as 3 days.

Your instructor resource kit comes complete with an instructor's manual, an instructor's CD, first aid/CPR/AED presentations on DVD and a student manual. You'll also get exclusive product pricing with NO annual fees and much more!

We've updated our training to incorporate Video-Self-Instruction (VSI) for CPR skills. With VSI, students practice CPR along with the video, taking their cues from the rescuer on the screen. VSI is shown to result in better CPR skills acquisition and retention than traditional teaching methods. And, it helps you provide consistent instruction on a tight teaching schedule.

As an added bonus, all NSC instructors get exclusive access to our Web-based First Aid Instructor Portal, which contains downloadable promotions, administrative documents, course outlines, state-by-state approvals, product previews, trade show listings and more. Plus, you get free student recordkeeping! Visit emergencycare.nsc.org.

Standard First Aid, CPR, and AED Student Manual

Each participant receives a 64-page workbook with full-color photos, illustrations and skill demonstrations. Globally recognized completion cards are included.
