safety excellence

NSC Safety System Assessment

Powered by NSC Navigator

“The Safety System Assessment alone is worth signing up for the *Journey to Safety Excellence*. Add to that the guides, tools and other useful information provided and I would highly recommend this resource to anyone wanting to make the journey.”

Sara C.,
Safety Coordinator,
Flomax Compression Ltd.

How does your safety program measure up?

Knowledge is power. It is often what you don't know that can hurt you. When lives are on the line, you need to do everything possible to keep your workforce safe. Having a comprehensive safety program is crucial to protecting your workers, but you also need to know how it is performing to avoid unnecessary risk.

Just like our health, our safety systems need regular checkups to function at their best. An easy way to monitor this is with our NSC Safety System Assessment – free when you sign up for the *Journey to Safety Excellence*®. Every industry comes with its own set of risks that can be addressed through traditional safety and health practices, but the assessment highlights additional areas where you should exert more control.

Continuously measuring your safety performance puts you on the path to improvement. The NSC Safety System Assessment helps you evaluate your own practices and how they compare to others. This empowers you to see what you are doing well, but also helps you focus on key areas where you can do better. Even organizations with top safety programs do regular assessments to avoid the trap of complacency.

With the NSC Safety System Assessment, you get:

- A FREE benchmarking measurement tool, rooted in research and tested in practice
- A thorough analysis of the eight safety program categories outlined in the *Journey to Safety Excellence*:
 - ◆ Management Leadership & Commitment
 - ◆ Motivation, Behavior & Attitudes
 - ◆ Workforce Involvement
 - ◆ Operational Processes & Procedures
 - ◆ System Management & Communication
 - ◆ Training & Orientation
 - ◆ Hazard Identification & Risk Reduction
 - ◆ Assessment, Audits & Performance Measures
- Your results compared against the NSC Database of nearly 500 companies
- An opportunity to set a baseline measurement against which future improvements can be gauged

Measure comprehensively

This 69-question assessment is a self-reporting tool designed to be completed by the person responsible for safety. Because it is cloud-based, your data and results are stored and accessible for future use and reassessment.

Results include:

- Item benchmarking analysis of scores on all 69 questions compared to the database
- Category benchmarking analysis for each of the 8 safety program categories in the *Journey to Safety Excellence* model
- Benchmarking of your overall score compared to hundreds of other companies that also completed the self-assessment

Act purposefully

Move forward on your *Journey to Safety Excellence!* Results from your NSC Safety System Assessment like those below can be used to develop plans for improvement in one or more categories or even individual items. With your results in hand, you'll be able to act with purpose, knowing you've identified and are addressing safety vulnerabilities within your company.

Don't wait! Access the NSC Safety System Assessment today. Visit nsc.org/journey to log in and get started with your own FREE assessment. It's that simple!

Additional resources

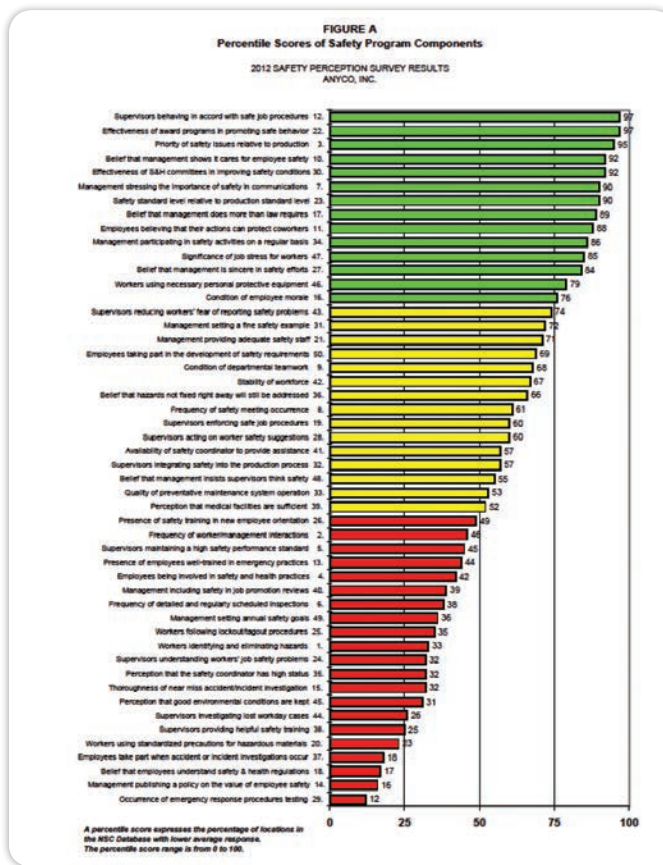

For additional analysis of your safety system, NSC offers in depth employee perception surveys as well as consulting services to help make your results not only meaningful, but actionable. Find out more when you visit nsc.org/surveys.

Visit nscnavigator.com to learn about safety management solution, NSC Navigator, a highly adaptable Web-based program that allows you to measure your safety performance, tracking areas of improvement as well as successes. This program engages employees at every level, giving them the ability to enter hazards, near misses and incidents into a centralized database. Immediately actionable, this database creates reports that expedite the correction of hazards and reduction of risk, ensuring a safer workplace.

Visit join.nsc.org to see why more than 51,000 members have joined NSC. As an NSC member, you can take advantage of resources designed to guide you and help keep your employees safe. Member-exclusive benefits include FREE publications, tools and resources as well as discounts on events, products, publications, training and more!

- ▶ **Percentiles ranging from 0 to 100** express the percentage of organizations in the NSC Database with lower average responses than recorded in this survey.
- ▶ **Green bars** indicate responses in the top 25% of all assessments in the NSC Database – high performance worth replicating in other areas of the company.
- ▶ **Yellow bars** indicate responses greater than the 50th percentile but less than the 75th percentile – good performance but areas to monitor and improve.
- ▶ **Red bars** indicate responses lower than the 50th percentile – less than average performance and areas likely to need immediate attention.

Percentile scores of responses to groups of questions regarding a single safety program category. ▼
