

Don't Choke! Act Fast When Someone Is in Distress

1

Encourage coughing when someone chokes. It helps expel the obstructing item.

2

Perform Abdominal thrusts if they can't cough, speak or breathe:

- a. **Stand behind** the victim
- b. **Place one foot forward** between the person's heels
- c. **Make a fist with one hand** and place it just above the navel
- d. **Place your other hand** on top of your fist
- e. **Give quick thrusts inward and upward** to clear the object

3

Call 9-1-1 and begin CPR immediately if the victim becomes unresponsive.

CHOKING IS THE #4 CAUSE OF UNINTENTIONAL DEATH.

The universal sign for choking is hands clutched to the throat. Recognize the danger & act quickly. You could save a life.
