

## NSC Navigator *Incident Management*

### Reduce risk and injuries in the workplace with NSC Navigator

To respond effectively to incidents, you need a system you can count on. Nothing lost, nothing ignored, nothing forgotten. **NSC Navigator Incident Management** gives you that confidence. Every incident, near miss and hazard gets handled right the first time. By addressing the risk immediately, you prevent further injury and make your workplace safer.

**NSC Navigator Incident Management** or **NSC Navigator Incident Management Pro** gives you the information you need to act promptly to reduce workplace risk and injuries to your people, based on root cause determination and corrective action management. Something you'll never get from the static paper records and spreadsheets most companies still use.

#### With NSC Navigator *Incident Management*, you can:

- Control and eliminate hazards faster
- Report hazards, near misses and incidents with injuries or illnesses
- Manage investigations and corrective actions
- Streamline and print accurate OSHA300, 300A and 301 logs

#### In addition, NSC Navigator *Incident Management Pro* allows you to:

- Enable all employees to enter reports directly into the system
- Report property damage and vehicle incidents
- Analyze and report incidents by cause, injury, body part or type and more
- Have incidents, investigations and corrective actions trigger automated alerts
- Feed analysis tools like "5 Why"
- Create incident scorecards
