### **Avoid unnecessary mistakes with NSC Navigator**

Relying on spreadsheets to manage safety inspections leads to mistakes – lost information, missed deadlines and zero accountability. Mismanagement of corrective actions can result in higher risk of injuries and fatalities. You need a tool that makes assigning, tracking and managing safety inspections easier to help you create a safer workplace. This tool is **NSC Navigator Safety Inspection Management**.

**NSC Navigator** gives you confidence that your reports are timely and accurate and helps to simplify and expedite your safety inspection and corrective action processes. You will get automatic alerts for important deadlines and can access all of this information anytime, anywhere from a computer or mobile device.

**Whatever your need, NSC Navigator Safety Inspection Management is ready to help:**

- Safety inspection checklists for facilities and equipment
- Safety policy verification, record keeping, and compliance documentation
- Safety assessments for job tasks and standard operating procedures

NSC Navigator Safety Inspection Management saves you time and money, and gives you a proactive approach to corrective actions. Fortune 500 companies are using NSC Navigator to improve their safety inspection and corrective action management. Now, you can too.

**NSC Navigator Safety Inspection Management** along with our **Incident Management** and **Training Management** offerings are designed to allow your organization to begin the Journey to Safety Excellence in an efficient and cost effective manner. The product is accessed over the web and is designed for ease of use – you can get started as soon as you log in without need for formal training.

**Call (800) 672-4692** or visit **nsc.org/navigator** to get started today.

**Be safer. Be smarter. Be sure.**
