Eye Safety: Focused on Protection		Pipeline Safety	
		Power Press Safety	
		PPE: Armed for Safety	
		Preventing Slips	

Your Innovation in EH&S Training Management

NSC Virtual Classroom powers your environmental, health, and safety training program through an easy-to-use technology platform that brings increased flexibility and more course delivery options for you and your employees. Robust training administrator software combined with hundreds of technically accurate, engaging online and streaming video training programs helps ensure your environmental, health, and safety training program is both effective and compliant.

✓ Easily manage all of your training curriculum, including online, streaming video, classroom training sessions, and DVD rental or purchase

✓ Save time with automation and global management tools that eliminate unnecessary data administration tasks

✓ Flexible administration lets you manage and track the data

Administrator Features

- Flexible structure allows you to build as many user levels as you need to fit your organization
- Assign specific tasks and access rights, such as add students or change training assignments, for each level of administrator to customize the usage for your team
- Customize your administrator start page with quick links to your most used applications to make it easy to access the information you need with a single click
- Administrator dashboard continuously updates with new information and latest activity

Reporting

- Receive reports as you need them on the data you want to know, with customizable reports delivered to your email inbox
- Easily export reports to Excel or other database formats
- View and run reports for the entire student population down to a single student
- Report filters include: date, location, individual, status, or course
- Survey tool to create and send course and training evaluations to students

nsc.org

Accessibility & Performance

- Operates on all Microsoft supported versions of Internet Explorer, Chrome, Mozilla Firefox and Safari
- Accessible via mobile devices, including smart phones and tablets
- Easily purchase and modify existing content and subscriptions
- Single access for both students and administrators to Online OSHA 10 & 30 Hour training and online HAZWOPER training through the same login and training portal
- Robust help functions include video overviews of each section to visually guide users, and access to the Help Desk for IT support on every page
- All sites are tested daily and weekly to ensure a reliable system - NSC Virtual Classroom runs at a 99.95% up time, which benchmarks to major websites

Student Management

- Easily import and upload student data via a spreadsheet template
- Access student data and find course topics quickly to make assignments fast and easy with multiple keyword search
- Enable students to self register for training, saving you time
- Internal email messaging system to communicate directly with students
- Email templates allow you to customize your communications with students, including training assignments, course notifications, and reminders
- Easily move student and user data within the system; change student location or department on the fly
- Enable students to print course completion certificates
- Set the pre-determined schedule or length of time for students to access to the courses, allowing you to configure your training program and move on to other action items

Course Management

- Create a learning experience to your requirements with multiple course settings, including:
 - Set pre and post-test score passing percentage
 - Optional quiz retake
 - Optional pass-out of pre-test
 - Set number of allowable quiz attempts
 - Turn on/off or make optional pre-test and quiz remediation
 - Set timed navigation
 - Set quiz retake date, pre and post test passing scores, and quiz attempt limits
- Easily assign course(s) to the entire employee population or a single student
- Create course sets for ease of assignment to students within groups or departments, for example, "New Hire Training"
- Easily import your SCORM courses to launch all of your training

Features and Capabilities

NSC Virtual Classroom, powered by Summit Training helps to save you time, streamline your training and reporting, and offers a superior user experience for both administrators and students. NSC Virtual Classroom adds a number of new and enhanced features to ensure your safety and compliance program is easy to manage for you, your business and your employees.

Operating System	Cloud based, operates inside Internet Explorer 8+, Google Chrome, Mozilla Firefox, and Safari
Mobile Accessibility	Accessible via any mobile browser
Corporate structure within Administrator	Flexible structure allows you to build as many user levels as you need
Administrator Start Page	Customize the start page with quick links to your most used applications
Administrator Dashboard	Automatically updates with new information and latest activity
Student Search	Multiple keyword student search
Course Search	Multiple keyword course and topic search
Automatic Reports	Set up reports to run automatically at your preferred time, and deliver to you via email
Administrator Levels	Specific tasks, such as add students or change training assignments, for each level of administrator
Instructor Led Training	Schedule instructor led training and tie it to the courses within NSC Virtual Classroom
Changing User Data	Easily move student and user data, and change student location or department within the system
OSHA 10 & 30 Hour and HAZWOPER Training	Seamlessly integrated within NSC Virtual Classroom, single login for users
Email Functionality	Email templates to customize your communications with students, including course assignments
Help Functionality	Video guides throughout to help users
