

**Advanced training
instructor-led classroom and onsite**

Team Safety

Create an effective safety team

Team Safety shows you how to make group safety efforts work for your organization. You'll learn how to build an effective safety team, or get the most from the team you already have. This course includes a self-assessment of your level of understanding and interactive exercises.

What you'll learn

- Recognizing and using key safety and health terminology as well as team safety
- Creating an effective safety team
- Identifying team members training and development needs
- Communicating effectively
- Helping your team influence your organization
- Building strong meeting management skills
- Providing your team the tools to positively impact your organization's safety culture

Course description

Employee involvement is the key to a successful safety program. Make group safety efforts work for your organization through the power of this program.

Course materials

- Participant Workbook

Who would benefit

- Safety managers
- Coordinators
- Specialists and other full-time safety practitioners
- Safety committee members
- Operations managers
- Loss control managers
- Human resources professionals
- Anyone with safety responsibilities.
