### First Aid Skills Card

## THE NATIONAL SAFETY COUNCIL™ HAS LONG BEEN RECOGNIZED AS THE LEADER IN EMERGENCY CARE TRAINING. OUR PROGRAMS OFFER THE VERY LATEST TECHNIQUES.

Not every injury or sudden illness is life-threatening. But immediate action when an emergency occurs can mean the difference between a quick, complete recovery and a long, painful one. Whether it's a simple sprain or a serious incident, the National Safety Council First Aid course teaches you to care for an injury or illness until professional help arrives.

We give you all the background information you need to feel confident in the event of an emergency—and help you to save a life.

If you need first aid training, go with the industry leader. The National Safety Council's First Aid course offers more training options, customization and the most up-to-date information. The Student Workbook serves as a great onsite reference guide you'll use again and again. Now it includes a pull-out First Aid Quick Guide. The 3 1/2-hour course covers:

- Why learn first aid?
- Shock
- Bone, joint and muscle injuries
- Heat and cold emergencies
- Taking action in an emergency
- Burns
- Sudden illness
- Rescuing and moving victims
- Bleeding and wound care
- Serious injuries
- Poisoning

If you want to teach first aid, the National Safety Council is the smart choice. If you're already an instructor with another program, NSC can grandfather you in. Or, you can become an NSC authorized emergency care instructor in as little as three days.

Our instructor materials make it easy for anyone to start teaching. Your Instructor Resource Kit comes complete with an Instructor Manual, Instructor CD-ROM, course presentation on DVD, and a Student Workbook. You'll also get a course completion card, exclusive product pricing with no annual fees and much more!

### First Aid Student Workbook
