

DRIVER IMPROVEMENT

Defensive Driving Course – Professional Truck Driver Online Course

Truck drivers can now learn at their own pace

DDC-Professional Truck Driver (PTD) Online is a convenient alternative to our classroom course and is just as effective in providing proven techniques for avoiding collisions and their related costs. The program uses animation, narration and interactive screens to engage drivers and enhance retention. Simple directions and navigation allow users to complete the course with ease, without computer knowledge. Drivers can train anywhere there's a computer and an internet connection. No software is needed.

What you will learn:

- The most common causes of truck-related collisions, plus practical knowledge and techniques on how to avoid them
- The challenges of driving large vehicles and dealing with uncontrollable conditions and hazards
- Real-life driving simulations
- Protecting the safety of the motoring public

Course description:

With DDC-PTD Online, you can train any size group — even at remote locations — for far less than the cost of one preventable collision. Online management reduces recordkeeping efforts and administrative costs even further. Employees can train at their own pace, even in the comfort of their home. A bookmark feature enables them to return and review any portion of the program before taking the open-book test. Grading and certificate issuance are immediate.

Product #	Description	Number of Users	Member Price per user	Nonmember Price per user
CR33865-0000	DDC-Professional Truck Driver Online Program	1-50*	\$49.95	\$62.43
