

# FIRST AID

## First Aid Taking Action — Advanced Training

Appendices offer information on advanced resuscitation techniques and disaster preparedness.

### Advanced skills for emergency response professionals

#### Immediate response to emergency situations is critical. Are your employees prepared?

This 16-40 hour advanced first aid course from the National Safety Council will help them recognize and act in an emergency to sustain life.

#### What you'll learn

- Basic life support for breathing and cardiac emergencies
- Controlling bleeding and managing shock
- Caring for injuries and medical emergencies
- Special situations, including behavioral emergencies, pregnancy and childbirth, and remote location first aid

#### Course description

This 16-40 hour advanced first aid course prepares individuals to recognize and act in an emergency to sustain life. Designed for the lay rescuer, as well as the health care professional, this program meets cardiopulmonary resuscitation (CPR) and emergency cardiovascular care (ECC) guidelines and exceeds OSHA standards for emergency care. It is ideal for organizations requiring advanced first aid training or as a college-level course.

#### Course content

##### Instructor Resource Kit

- 300-page Instructor Manual on CD with PowerPoint® presentation and test bank
- Three DVDs using Video-Self-Instruction (VSI) and Watch-Then-Practice teaching methods for CPR and first aid training
- Student Textbook

##### Student Textbook

- 500 pages of full-color illustrations, step-by-step photo sequences and skills presentations, plus statistics and checklists
- Nationally recognized course completion cards

#### Who would benefit

- Emergency response teams
- Safety personnel
- Health care professionals
- College students
