

National Safety Council

Position/Policy Statement

Weight Limits on Cargo Containers

The National Safety Council urges the Federal Maritime Commission to again require that all maritime cargo containers be placarded with actual weight rather than stamped with standard weight before departing ocean terminals.

This position statement reflects the opinions of the National Safety Council but not necessarily those of each member organization.

Approved by the Governmental Relations Committee, October 30, 1990

Approved by the Board of Directors, October 31, 1990
