Instructor-led classroom course

NSC CPR & AED

Superior training to improve CPR and AED skills retention

This 3.5 hour CPR and AED course prepares anyone to respond to choking, breathing and cardiac emergencies—and how to use an automated external defibrillation unit in conjunction with CPR. **This NSC® course meets the latest CPR and ECC Guidelines** using a combination of instructor, Video-Self-Instruction and hands-on training.

What you will learn

- Taking action in an emergency
- Assessing the victim
- Provide basic life support, including airway management, breathing and circulation
- Using an AED

Course materials

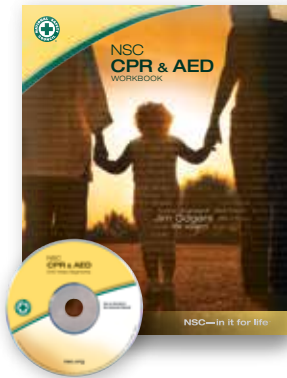

Instructor Resource Kit

- Instructor Manual and CD
- Instructor DVD featuring VSI training
- Instructional DVD on how to set up the classroom
- Instructor Resource CD with administrative documents
- Student Workbook with CPR & AED DVD

Student Workbook

- Full-color photographs, illustrations and skills demonstrations
- Course DVD
- Nationally recognized course completion card
