

2019 National Safety Council EHS & Sustainability Policy

The National Safety Council is determined to eliminate preventable deaths in our lifetime. This begins with our "Nobody Gets Hurt" commitment to our own workers, their families, and the communities in which we operate and live. We hold safety as a fundamental value, and strive for environmental, health, safety, and sustainability excellence in everything we do. In the words of our first President, Robert W. Campbell, it's the "right way to do things."

Nick Smith
Interim President & CEO
