Install Instructor Materials

Course Item	Status
 Install Instructor Materials Click Download to retrieve the Installation File. Once the download is complete, launch the file to install the materials to your computer or a USB Drive. You may receive a number of warning messages. The install will be canceled if you don't explicitly allow the program to continue. When warned in windows 10, you will need to click the "More Info" link before you can use "Run Anyway". Other operating systems/versions should be similar. Once installed, the Materials will be in a folder named "NSC Course Materials". BEFORE clicking "Extract" be certain to select the location where you want all NSC Instructor Materials stored. We recommend your Desktop, your main hard drive (typically c:) or the drive letter for the USB you've inserted. Remember to use the same location for any future material downloads. You can type the location into the extract window or use the browse button to select it. Please be patient: These files are very large and make take a significant amount of time to process before you see the extract window. Please be patient and do not launch the downloaded file multiple times as this will only slow your computer further.	Complete Download
