A SAFER Workplace is in SIGHT

Be aware of your surroundings and learn to see safety hazards. It’s an easy yet effective way to reduce injuries.

The danger: What to do:

- Cabinet drawers left open
  Open one drawer at a time and close it when not in use

- Heavy objects stored precariously on high shelves
  Store heavy objects close to the floor & out of walkways

- Forklifts working in warehouse aisles
  Be aware and make yourself visible to the driver

- High stacks of heavy boxes
  Wear the proper personal equipment such as steel toe shoes to help avoid injury

229,170

The number of injuries with days away from work in 2012 due to contact with an object.
