## **6 SAFEGUARDING**

## **CASE STUDY**

Rudy Baxter has grown up in the family business, Truesdale Extracts, which has produced gourmet flavorings for 100 years. Part of the secret to the company's exceptional extracts is adherence to the traditional methods that Grandfather Truesdale first put in place. With his background in engineering, however, Rudy can see that some phases of production can be improved with updated machinery without compromising the quality of the product. Bringing in new machinery would entail a lot of considerations.

1. What are some basic safety questions Rudy should as	1.
--	----

- 2. How should new equipment be set up with the operator in mind?
- 3. Are there points to consider about the machine controls?
