

National Safety Council

Position/Policy Statement

Extended Safety Belt Usage

The National Safety Council has long been on record supporting the need for motor vehicle occupant protection, primarily through the use of safety belts.

Therefore, the Council's Board of Directors recommends that each member organization adopt a policy on the use of safety belts for employees.

This position statement reflects the opinions of the National Safety Council but not necessarily those of each member organization.

Approved by Board of Directors, October 19, 1976
