

National Safety Council

Position/Policy Statement

DOT Regulations on “Clear Zones”

The National Safety Council supports Department of Transportation (DOT) regulations that reduce the frequency and severity of roadway-departure crashes including “clear zone” areas, gentle “side-slopes,” and devices that keep drivers on the roadway.

This position statement reflects the opinions of the National Safety Council but not necessarily those of each member organization.

Approved by the Board of Delegates, October 16, 2000
